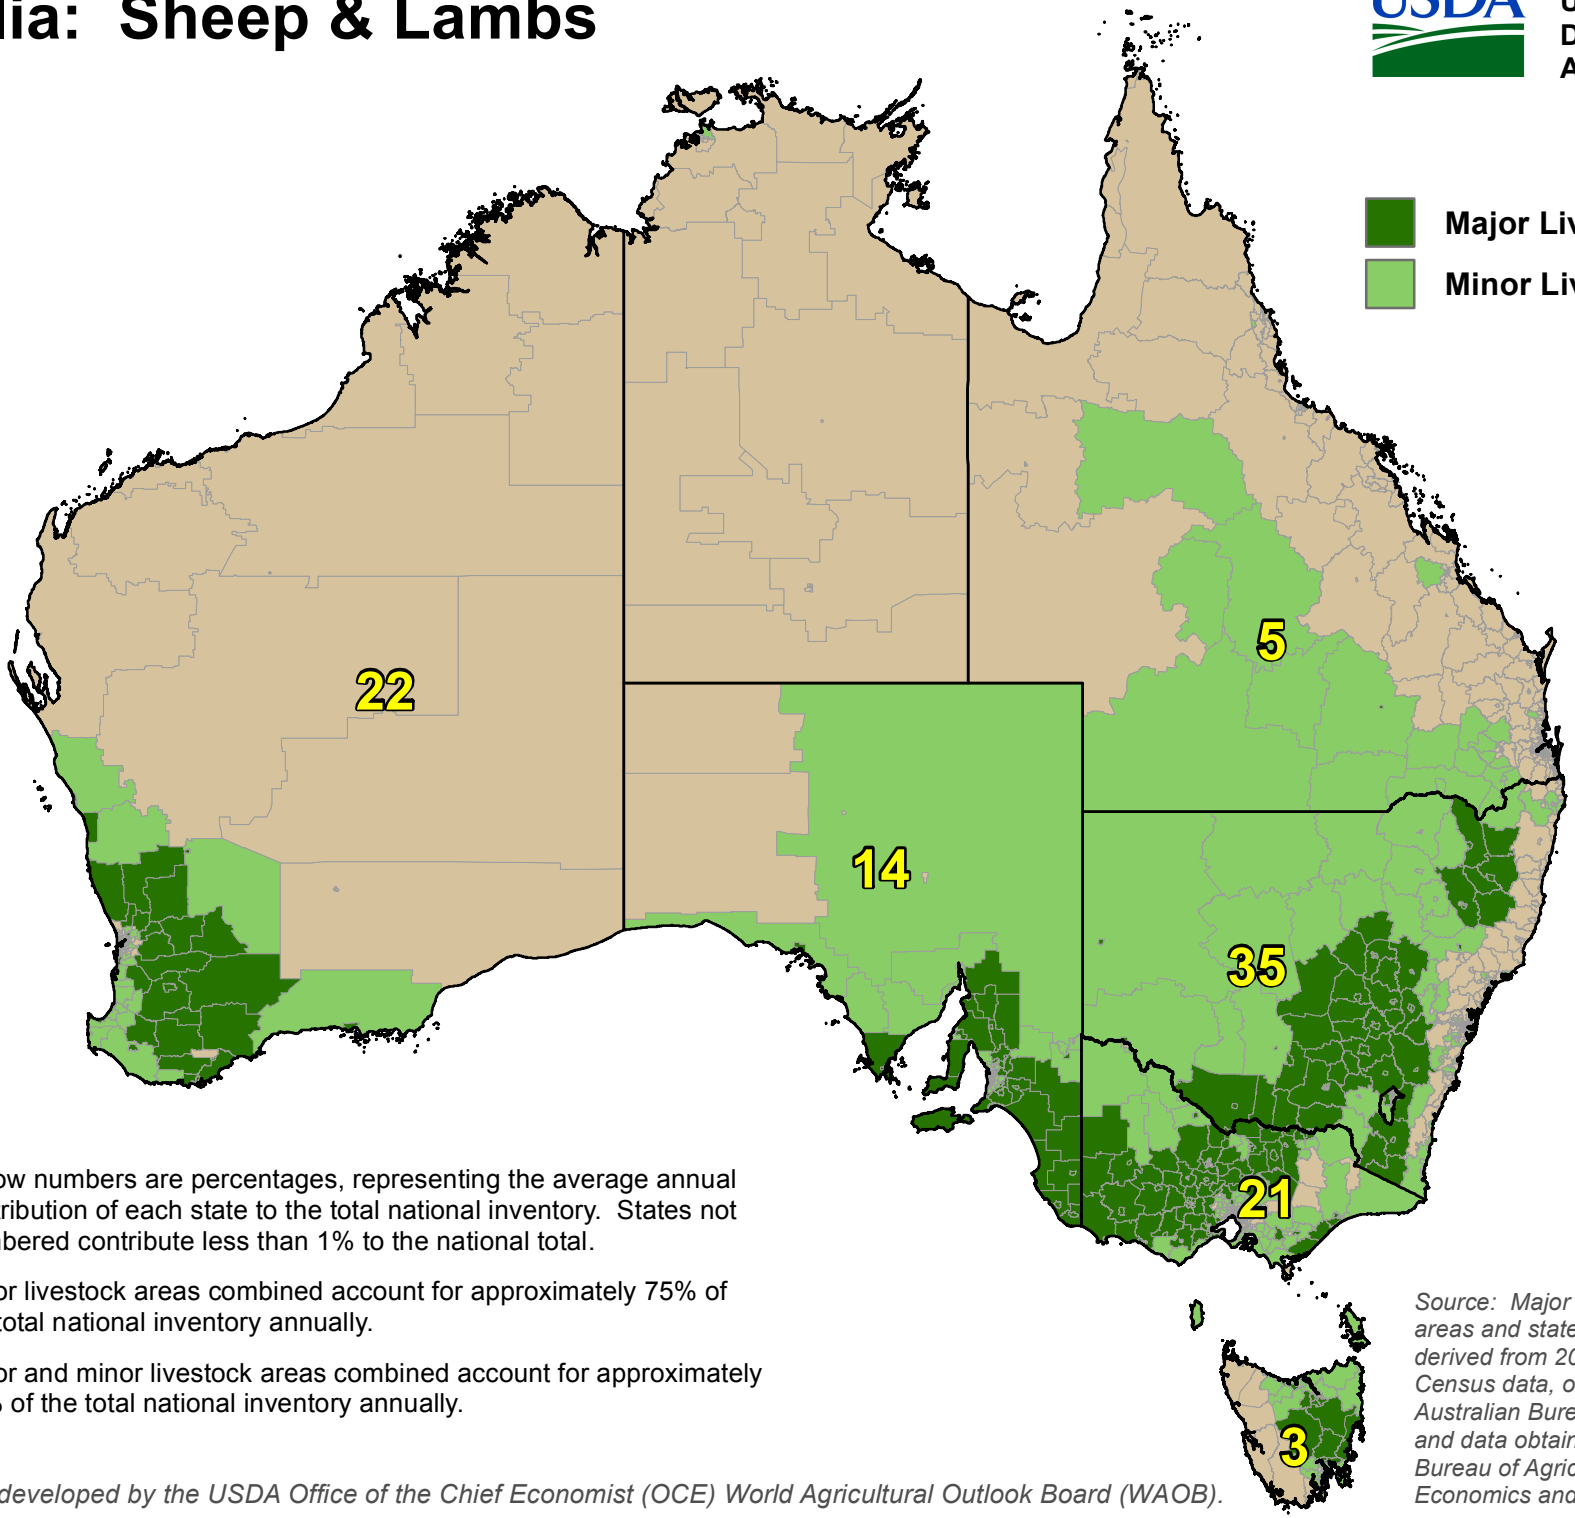
Australia: Sheep & Lambs

United States Department of Agriculture



- Yellow numbers are percentages, representing the average annual contribution of each state to the total national inventory. States not numbered contribute less than 1% to the national total.
- Major livestock areas combined account for approximately 75% of the total national inventory annually.
- Major and minor livestock areas combined account for approximately 99% of the total national inventory annually.

Source: Major and minor agricultural areas and state percentages are derived from 2010-11 Agricultural Census data, obtained from the Australian Bureau of Statistics (ABS), and data obtained from the Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES).

This product was developed by the USDA Office of the Chief Economist (OCE) World Agricultural Outlook Board (WAOB).
