08-26-05

Sir;
thank you for your concern about farming.
I came to this valley (1943) as an orphan, which I believe was the hand of God, we were raised up the road on a farm that gave us kids an opportunity to learn what "hard work" was. I soon learned that our physical labors put the food on the table, literaly. and that made us work the harder.
Since then I have been working on better ways to do crops.
I am building a facility that will prove my point.

Sincerly,
Al Joyensen
