The best way to encourage the next generation of farmers is to ellimivate the estate tax. It is not a tax for the rich. It is a tax that makes farmers convert assets to cash to pay the tax. I am a 3rd generation farmer on a 100 year farm. If I am to take over that farm, the only way to pay the tax is sell the land. Ellimiate the estate tax so that family farms can stay in the family.
