A friend of mine just got a check for over \$800 for crop compensation from 2003. He did not apply for such payment and was surprised to get it.

I believe this sort of thing is inevitable when huge sums of money are handled by institutions where there is apparently no accounting or consequence for mishandling funds.

Will the new farm bill address this? It is an enormous problem at all levels of government. It is my opinion that government being involved in agriculture creates far more problems than it solves. Waste of taxpayer money is only the tip of the iceberg.
