zipcode: 49009

Question1:

Question2:

Question3:

Question4: Continue to support such efforts as CRP, CREP, Wetland Restoration, through appropriate funding which will support and encourage enrollment of "at risk" land.

By congress continually hedging, on the future viability of these programs farmers and ranchers are not able to properly plan for their future use of land. We need to see a commitment to the future of these programs by supporting current and continuous appropriation of funds through the Farm Bill.

These programs benefit, Land Owners through financial incentives, Environmental Policy via habitat restoration, and the General Public by providing improved water and air quality.
