Question1:

Question2:

Question3:

Question4: We must absolutely continue the CRP program. This is so essential to the future of wildlife and also our rivers and lakes. I don't think it is good enough to just continue the program the way it has been but to expand the program. We must encourage farmers to take out of production the marginal lands that in the past were suited for wildlife and also were central for clean water. The farmer should be justly compensated for this practice. I would like to see the government put these lands into permanent retirement. By doing this our lakes, rivers, streams and wildlife would greatly benefit. Thanks for your time. Steven P. Payne, New London, Minnesota
