Question1: Effectively cap program payments to prevent the big from getting bigger.

Question2: Keep our policy, rules and programs out of the way of the sustainable/organic smaller operations.

Question3: Effectively cap payments to prevent the big from getting bigger. If the playing field is leveled the best producers will produce the best not at the expense of the taxpayer or the environment.

Question4: Government policy, rules and regulations need to stay out of the organic and sustainable farming movement. These movements just need a level playing field. Set up minimum conservation and environmental goals such as the Conservation Security Program and let the best conservation farmers run their business.

Question5: Eliminate the excessive program payments to large farms.

Question6: Facilitate a national coop that links local food producers with local food purchasers.
