Question1:

Question2:

Question3:

Question4: By stressing the importance of endangered species and wildlife habitat and let willing farmers have waivers when there is a insignificant lein or judgement on property that is already controlled by the Farm Service Agency anyway, that being first mortgage holder. I am being turned down for a conservation easement program stressing wildlife habitat because I do not have the money to pay a lein and a credit card judgement. My local FSA office and I have been working on above Conservation Easement Application, for 2 years; the one that will be in effect for 50 years and when it was approved by the different agencies, at the last minute I was informed of lein and judgement as to no longer service the Conservation Easement.
