Question1: Further the evolution of alternative uses for crops to raise prices such as ethanol.

Restrict the development of rural farmland by city dwellers migrating to rural areas and splitting up farmland into smaller sections.

Reduce inheritance tax of farms.

Question2: Tax imports from other countries of resources already produced by the US. Other countries can produce most things cheaper than the US because of weak economies and less policies and inspections to comply with. Don't allow other countries to sell resources in the US cheaper than we can produce them.

Continue development of products made by US crops such as ethanol.

Question3: Provide education assistance to small farmers to help them develop and expand their operations in order to compete.

Give assistance to create more COOPs so large farms can be owned by multiple farmers.

Question4: Keep the CRP program and further expand other conservation programs to protect wetlands and other wildlife habitat. This will bring in more people into rural areas to see wildlife, hunt, enjoy nature and respect rural america.

Question5: Provide education and develop technology to assist farmers.

Farming is a business and education is needed to teach farmers about business.

Question6: Get farmers more involved in the process.
