Question1: A good way for young farmers to start farming is the resumption of the FMHA program for young farmers.

Question2: Free trade may not work well for the EU & USA. When economies are manipulated & there is a disparity in wages; the playing field is off. If we grow it, we do not need to import it. With a fair price, the US farmer will be happy to grow/supply commodities.

Question3: We need to identify "true" family farms. Example: Up to 4000 acres farmed. Husband wife, children. No full time employed farms (none hiring illegals). "Family farms" need to be supported.

Question4: Farmers have been stewards of the land. Government conservation & environmental rules cost us money. We need to be good stewards for our own profit and for the next generation. Farmers should have a County board to police themselves.

Question5: The elimination of vertical integration. That being the owning of livestock, packing company, & retail brand (for example) all together.

Question6:
