Question1: Current federal agricultural policy fails to serve the interests of most Americans, including taxpayers, consumers, and small businesses as well as farmers and producers. Agricultural subsidies and income supports have cost taxpayers over \$20 billion every year, along with driving up prices for grocers and consumers. All of these programs amount to a sticky web of "food taxes" that also serve to fatten the bottom lines of agribusiness, encourage family farm sell-offs, and undermine trade relations.

The 2002 Farm Bill responsible for many of these calamities is set to expire in 2007, but you have an opportunity right now to help influence the future of our agricultural policy for the better -- everyone can benefit from less government regulation

Thank You

Question2: Completely Remove all Subsidies from any entity with more than 1000 acres of crops.

Question3: See Question 2, NO Subsidies to an entity holding more than 1000 acres.

Question4: encourage farmers with small holdings. Discourage large holdings!

Question5: No Subsidies. Offer help in the form of advice on better crops!

Question6: NO PRICE SUPPORTS!

Let the price of produce float according to the producers ability to market, No Middle men, No distributors.
