Question1: Support should be for family size only, additional size of farming operations should be at the expense of the farm only.

Question2: Regulations should be applied to imported commodities the same as domestic production.

Question3: Don't need government crop insurance. Support payments should be increased on production with lower limits resembling family size (example - standard income for and average family)

Question4: Conservation is good, but should be required for compliance to receive program benefits.

Question5: Rural economic growth should be oriented to developing unused or underused property.

Question6: We do need research and development for agriculture. Universities and extension services can to an excellent job of research.
