Question1: Direct payments should be eliminated as they automatically get capitolized into the price of land and rent. Crop insurance subsidies should have a cap so as not to encourage farms to get to large. If farmers want to grow beyond a certain point they should do it at their own expense and not at the expense of the gov. Bring back a limited farmer owned reserve. This was a good marketing tool and would help keep corn from going to high in short crop years thus hurting demand and encouraging higher land values.
