Question1: Corporate farming must not continue to reap the large \$ support as it gobbles up the 'family' farms. Assistance to allow family farms to continue must be provided. As

outsourcing of other jobs continues, farming may be one of the few "home grown"

endeavours that can survive the 'has been country' for which we are headed (20 yrs)

Question2: Hemp (non-smokable) now shipped in from Canada, but an

illegal crop in USA, must be made available to our farmers

Flexability is a must so land

can be used to grow crops that c/b competitive NOW.

Question3: No idea!

Question4: Don't require stringent ad-

herance to a conservation policy and expect our people to compete with

countries that do not enforce adherence

Question5: Something has to be done so a

farmer is not put on a position of "I can't NOT sell

to landdevelopers." Outsour-

ing the growing of our food is next to hit us.

Question6: Serious 'think tank' work is needed. We must not continue

the status quo. Fed \$ needs to be available to create by-

products now wasted; longer shelf life, cheaper packaging

Question7: Serious 'think tank' work is needed. We must not continue

the status quo. Fed \$ needs to be available to create by-

products now wasted; longer shelf life, cheaper packaging

Question8: Serious 'think tank' work is needed. We must not continue

the status quo. Fed \$ needs to be available to create by-

products now wasted; longer shelf life, cheaper packaging
