Question1: Agriculture in the USA is much different than when the subsidies were put in place. It is time to discontinue subsidies. Our agriculture business today is very capable of competing. Sure, we all look for an edge, but the Dept. of Ag is big overhead which could be downsized if we got LEAN. Then all taxpayers would benefit.

Question2: Educational programs and Ag periodicals meet the need.

Question3: It has been quite apparent to those of us in Ag business that the farm support system encourages increased size. Large farms get greater benefits. Discontinue the assistance and we will have a more level playing field.

Question4: Free enterprise will get the job done. Back off!!

Question5: Back off across the board!

Question6: Care in bio-research pursuant to adverse consequences toward effective nutrition, human and animal risk, market research uncertainty, and to ensure effective global consensus.
