Question1: It is such a disgrace how commercialized agriculture has become because of you and the rest of the greedy corporations. How dare you encourage overproducing so you can just destroy the crops? This especially applies, when you consider how many people will be starving to death in Niger this year.

Question2: Stop commercializing grass-roots!

Question3: Quit trying to stop U.S.D.A. products from reaching starving children's mouths just so you can funnel taxpayer dollars into George W. Bush's hoax, he calls a war on terrorizm. Gee - I wonder if they ever found those weapons of mass destruction, that he and his administration, drummed into the world's heads, on a daily basis, were being stockpiled in Iraq!?!?

Question4: Quit warehousing food. Get it out to the people who need it immediately!

Question5: Enact tax-cuts for small family farmers. Tax the Hell out of "Big Business" farmers.

Question6: Get the Fascists and Nazis that call themselves Republicans out of the White House.
