Question1: Payment limits would discourage large farms from taking all available land away from beginning farmers and driving up the land and rent costs.

Question2:

Question3: We need a payment cap so most farmers receive some assistance. I would like to see a \$100,000 limit that could be raised as the budget permits. The smaller farmer buys most inputs locally supporting rural communities and businesses, we need to strive to preserve the family farmers.

Question4: Organic farming needs to be a priority in the CSP program. Organic farming contributes No chemicals into the water, wildlife, or the environment. Soil building crops and crop rotation is required in organic and this reduces erosion and diseases.

Question5: Companies should get good incentives to expand or relocate to rural areas.

Question6: I would like to see incentives and more research for organic and specialty crops, renewable energy, and value added products. Providing safe new uses for crops opens up more markets for US farm products.
