Question1: the direct payment portion of the current program needs to be reduced or disbanded it only guarentees income to the landowners and larger operators hurts efforts of beginning farmers

Question2: we have the ability to produce the largest amount of grains and feedstuffs in the world we need to make sure we can get these to the world marketwith competetive freight rates and utilize the world market . we also need to be relieved of the now proven mistake that south america is not using genetic modified crops. we need to provide what the customer wants like the beef with japan. if a packer is willing to provide the testing to sell japan the usda should allow them to take advantage of that market

Question3: it should be possible to limit the amount of assistance to a certain level and if a producer wants to go beyond that they are on thier own. i don't know if dollars or acres would be the best limit.

Question4: make the programs understandable and accessible to producers.

Question5: by first limiting the amount of frderal dollars to individuals and corporation the rural population trends should be reduced then the rural communities would recover

Question6: remove the part of the government that controls the rules for developement and let the market take care of itself ethanol is \$.25 cheaper than gas but the blend is only \$.05 at the pump?
