City:

State:

zipcode:

Question1: Discontinue all Direct and CC Program Payments. Continue with a crop loan structure with LDP but on limited bushels per operator.

There is no other way. Keep a well subsidized Federal Crop Insurance Program.

Question2: The last farm bill really hurt efforts in this area, because it is slanted to encourage Oil and Feedgrain production. Get rid of direct payments would be a first step. Help fund startup projects would be another.

Question3: This is all true. I hate to sound like a broken record, but get rid of direct payments and limit the amount of bushels an operator can LDP or put under loan. An impossible task I know!

Question4: I think the programs are working well in this area right now.

Question5: I also think this is an area that should not be a part of any farm bill. I think this is more of a State and local issue.

Question6: Government sponsored research of developing technologies should be a main focus.
