Question1: The young farmer or rancher dont have a chance to get started unless his or her grandparents leave them something to get started with.

I am 27 and have been digging and scratching just to be able to what my family has done for years and years. it is just about not worth it to try to make a good life to give to your family because the government will just take half of it anyway. because now we have the death tax and gift tax. the government dont want the young person to make it.

Question2: we need to think about our food like all the government people think about OIL. we feed them but they would reather worry about trading oil then food without us why do you need oil. when the oil price dropps its a bad dill but the oil people can hold there oil till something better can be done with it the farmers and ranchers can not hold there cattle or wheat over they have a payment to be made at the bank. or will lose whats left of there grandfathers farm.

Question3: I think the farmers get to dependet on the programs thats the only way some of them make it around here. oil and fuel cost makes the price on every thing thats needs to be shipped skyrocket. so ther goes all there profit, up in smoke out the exhaust pipe. so now they need the program to make the ends meet.

Question4: ?

Question5:

Question6: there needs to be new ideas tried. the old ways of doing things is not working any more. we need research on new crops or products to supply the our countrys needs.
