State: Arkansas

zipcode: 72539

Question1: I think you need to get the land prices down so the poor man can afford to buy it.If they could afford it they then could farm the lands like the farmer used to and grow fresh fruits and vegetables that don't have the added drugs in them.We don't want to put this into our bodies,but in order to eat we have too.Is this not a form of communism?

You force us to eat stuff we don't want to.What happened to the farmer of long ago that could make a living off his farm? I'll tell you the greed of money has took over and the farmer starved out! Man will be his on demise by ruining our lands and eating stuff that he doesn't need in his body.Organic is the healthiest and safest way to go.People will have to start growing their own food to get food that is healthy.So i guess now you will raise the price of garden seeds to make another dollar.I'll bet thats what happens if we start buying the seeds you will raise the prices,Go ahead and do it then we will save our seeds from last years crops.Now i guess you'll make them seedless so we can't do that.You will figure out a way to make more money off the poor man,and put us all into a depression.The food we buy at the store is not the food we think it is.It is chocked full of preservatives and medicine that will kill us.It already has killed billion of people by causing cancer.Wake up people our grandparents didn't eat this crap why should we.

Question2: Read the above note please!! Why can't we grow our own stuff and sell it along the highways? We could get the fresh food we need.We don't need to buy foreign foods.Thats the craziest thing i ever heard of.We don't need that junk.If the foreign governments really want to be terrorist all they have to do is put something in our foods and it would wipe us all out.Why take the chance.Let's grow our own foods.Wake up!!!!

Question3: HELLO!!!! Low land prices and more farmers...

Question4: Leave our forest alone and stop cutting the trees and our land, air and water will be cleaner!!!! Wake UP!!!!

Question5: At least your thinking better.Help the farmers and put a ceilig on farm land prices so we can afford it!!

Question6: These changes are the problem with todays farmer.You have screwed them to death and they can no longer afford the land or the equipment.
