Address2:

City: Sweetser

State: Indiana

zipcode: 46987

Question1: Reduce production to raise prices as before.

Question2: Make your welfare payment based on need. We have farmers living in million dollar homes getting \$250,000 per year in welfare.

Base it on need like other welfare programs

Question3: Base welfare on need and helping young start up operations.

Question4: Keep CRP programs for wildlife management and expand more conservation programs

Question5: Small rural towns and rural home additions need to be hook up to Sewage systems.

Question6: Farm programs should be developed to promote organic farming instead of glutting the market then getting paid because the proce is down. What sense does that make?
