Question1:

Question2: I am concerned with saving small and medium sized farms and preserving the environment.

We must support rural communities, and we must support small and medium sized farms.

Our farmers' earnings in the US and world-wide, are racing to the bottom, while agribusiness earnings are going up.

Contracts in poultry and livestock are unfair to farmers, so please investigate and support legislation to make contracts fair.

The arsenic in the chicken feed (that is required by the big poultry companies) may be poisoning farmers and consumers. Please do what can be done to greatly reduce this practice.

Tax-payer funds should not be used to subsidize big industrial farms that are squeezing small and medium farms out of business.

I urge you to expand the Conservation Security Program (CSP) to reach all farmers who are eligible (as was intended in the 2002 Farm Bill).

Please expand research that will support small and medium sized farms instead of spurring more growth in industrial farms.

Please expand the Value Added Producer Grant Program and allocate more of those funds to small and medium farms.
