Question1:

Question2: If the U.S. is going to have free trade agreements with other countries. The U.S. had better make sure that all the other countries follow all the rules. In NAFTA the U.S. receives all the imports from other countries and they do not take the U.S. products. You have to have the same rules on both sides to have fair trade.

Question3: You have to have payment limitations for producers and make them alot lower than they are now.

Question4: The old farm bill had good conservation programs in them but the big farms are not following the rules. They are supposed to have waterways in the fields to control soil erosion or not receive the payment. different rules for different people again. You need to have a different program for the CRP program. you should not be putting whole farms into CRP you should be able to only put parts of a farm in. You are taking productive land out of production and you are taking money out of the small towns because we dont need to buy products to go a crop and taking money out of my pocket because I am losing land that I rent to make a living and feed my family.

Question5:

Question6:
