State: Idaho

zipcode: 83404

Question1: Subsidies to large agricultural corporations does not serve a purpose for helping new farmers. Additionally, taxes should be based on annual income derived from the assest (farm) rather than its value if it were sold.

Question2: Use US farm commodities to help negotiate and provide foreign aid to developing countries.

Question3: Gradually phase farm subsidy programs out. Increase tariffs for incoming farm products that compete with American produced goods. Canada beef dumped on US market does little to encourage efficient production of beef in the US.

Question4: Assist in conservation practices and provide some help on maintenance of such practices if correctly managed.

Question5: Help in applying new technologies.

Question6: Huge support for business and farm interest that produce fuel from farm products. We need to help produce fuel for this county and it will benefit all tax payers. On going tax breaks for wind development on farms, crops used to make methanol etc.
