Question1: The farm policy needs to be directed toward encouraging small local organic farms.

Question2: We need more local farmers with fresh high quality organic food.

Question3: the farm support system should be designed to encourage small farms.

Question4: Clean water is essential. Farm policy must encourage good practices that counter soil erosion. Farmers also should be encourage to plant native plants to attract beneficial insects to eliminate the need for pesticides.

Question5: We need to leave some of America rural and leave our land in agriculture. I am opposed to investing in infrastruture in rural areas.

Question6: Let us have less processed foods and more locally grown fresh organic food.
