Question1: The government is too involved in private industry when it comes to farming. I believe they should let free enterprise run itself and end all subsidies.

Question2: Once again, if US agriculture relies heavily on the government for support then maybe the US doesn't belong in agriculture. I am sick and tired of working extra hours so that I can pay all these extra taxes in order to subsidize.

Question3: Stop distributing assistance period.

Enough of this welfare.

Question4: Let the market determine that. This is NOT a communistic country. I can't believe the heavy hold the US has on this industry.

Question5: They should not be involved at all.

Question6: Let the farming industry determine how it should help itself.
