Question1: Do like the indians did when their council met to decide issues. Their decisions had to be good for the next 6 generations. Get rid of the lobbyists and stop letting Iowa be the guiding force for all who seek the presidency.

Question2: We don't need the governments to decide these issues let the free market do what they do best. GET rid of WTO!

Question3: Stop pretending that you are doing something for the small farmer and really do something for them.

Question4: Stop cutting the budgets for those programs.

Question5: the rural infrastructure could be changed with reform of the economic development programs that just keep throwing walmarts in our back yards to solve our problems.

Question6: I think we are all smart enough to understand the value added process and can do it ourselves without the government. As farming is now we could not do it. One thing you might do is address what the farmer is to do to handle the increase in fuel charges. Also we could use some health care. The rest we can figure out for ourselves. I work 24/7 so you can eat bread and steak. I fight all manner of pestilence and grow old and sick doing it. The least you could do is see that my husband and I get health care.
