Question1:

Question2:

Question3:

Question4: The policy must continue to make provisions for enhancing the previous Farm Bills and more particularly the CRP programs. With urban sprawl we have lost a tremendous amount of good habitat and quality waterways. We need more financial aid not less. If we do not continue to support the current CRP programs and enhance the available programs all the previous years work will be lost.

I am a landowner, a hunter an a Father of two young girls who I want to introduce to hunting and the beauty of a walk in a grassy field. I urge congress not to be short sighted and make the necessary financial commitment to CRP and the 2007 Farm Bill.

Question5: We have lots of options here, but we must do something about the mass exodus from rural areas to major cities. I can imagine extending tax incentives and training programs that can produce high paying jobs. In addition to building the future we can ill afford to lose the hunters tourist dollars in these area's. Without habitat we will lose the bird population and in turn lose the hunters and their spending in these rural area's.

Question6:
