Question1: helping farmers with tax credits on farm machines, land benefits: ie property tax, low interest loans, or one of many incentives to help the working farmers....

when you give subsidies for not working or planting, all you do is create a welfare system. a new wave of a non-working class. when you pay not to work, you have just destroyed employable people, let alone the waste of my tax dollars.

it must stop now. i don't care if they build bridges, or work on the infrastructure of cities. anyone you give money to should give back equal hours of labor.....
