Question1:

Question2:

Question3:

Question4: Our nation's urban and community forest are impacted not just by urban development, but also by agricultural policies.

Urban and community forest provide many environmental benefits that should be protected and enhanced. Many of the countries that have signed on to the Kyoto Protocol have included the urban and community forest in their environmental enhancement strategies. This farm bill should address the importance of retaining and expanding our urban and community resources as a strategy for meeting our nation's environmental goals.
