Question1: I believe we(farmers) need help in Urban Forestry. We lack the knowledge of raising timber effieiently and I feel most states have limited personnel to spend time with us. I own 176 acres of which 35 are tillable. The balance is woodland. Short of finding and paying a Professional Forestry expert, I do not know where to start. I would appreciate direction, guidance and knowledge to get better timber for the market.

Virgil
Question2:
Question3:
Question4: water testing equipment, more availability of trees for planting.
Question5:
Question6: Young School students should be involved in water quality and planting a tree.
