Question1: we need a safety net in place for both new farmers and old I believe doing away with the inheritance tax would be a good start.

Question2: I believe we can compete with any one if we have an even playing field.

Question3: one size fits all is always a problem. the farm program needs to be flexible as possible. crop ins. is getting regulated.

Question4: lift the cap on acres per county. And pay a good fair price for conservation reserve.

Question5: give us a break on property tax. And maybe subsidize farm fuel.

Question6: farmers are not financially able to do all this without Gov. help.
