Question1: Cut the huge welfare give-aways to large Agri-Busi-ness, but do give sub-sidies to the small farmer.

Cut, or stop altogether, purchasing fresh produce, meat, etc. from foreign countries. I want American products !!!!!

Question2: I am NOT INTERESTED in global competition !!!!

What I want is American produce and products available to the American consum-er. I DO NOT WANT inferior produce from foreign coun-tries. I don't care what it costs; I want QUALITY.

Question3: Like I said above:

CUT Gov't. Welfare Pro-grams for large Agri-Biz. BUT, DO subsidize the small and medium sized family farm.

Stop telling farmers WHAT to grow, and HOW MUCH.

The only regulation I want is much greater STRICT regulation in regard to our meat supply, plus higher standards for the produce coming into our country from foreign nations.

Question4: Of course, we ALL want clean water and air. But, I doubt that the small Ameri-can farmer is doing much to destroy that. So, forget about the snail darter and other insignificant critters, and let the farmer do his job without an oversupply of reg-ulation. Stop catering to the ultra-liberal environ-mentalists !!!!

Question5: Help keep our rural areas rural. Put the brakes on corporate farms gobbling up every square inch of farm land. WHO is going to bene-fit from "new infrastructure or new technologies ???" Giant AGRI-BUSINESS ?

Slow our population boom

by controlling unlimited  
immigration !!!! Otherwise,  
we are all going to be living in one-room houses,  
going to over-crowded schools  
and sitting in traffic jams  
for hours !!! Plus there will be increased crime, riots, and maybe  
even REVO-  
LUTION.....Let's get back to  
basics. Forget about MONEY,  
MONEY, MONEY. Get back to the simple pleasures of life. Good,  
wholesome, healthy food. Stop encourag-  
ing PROCESSED foods. Actually, I want ORGANIC  
foods, and am WILLING TO PAY EXTRA TO GET IT !!!!  
Question6: Stop worrying about EXPAND-  
ING our markets. Focus on  
QUALITY. I am violently  
opposed to scientifically-  
engineered foods. Get the  
scientists out of the food  
research business. Also, I  
don't want our American-grown  
tomatoes shipped to Africa, while we import tomatoes from  
Holland and Canada !! That is bizarre. Let them grow their own food,  
and eat it !  
I am sick of paying top \$\$\$  
for withered asparagus from  
Mexico, when ours is much  
better quality. Tired of  
hauling home fruit from Peru,  
and other points south, that  
is rotten before I can get home with it !!!! Etc., etc.
