Question1: I am grateful for every minute I could benefit from an organic farm that people paid for the benefit of it for a season. Since I don't have a car I'm grateful for the farmer's market close to where I live. These small farms need to be supported & benefit many greatly. I miss the fresh produce in the fall & winter & buy organic whenever I can cuz it tastes better & feels like it's best for me.

Question2: We need to concentrate on healthy foods & soy & corn should be limited cuz not as healthy as other grains & beans.

Question3: Farm support should be limited & go to all, not just the big farms. Success in past helps determine who should be helped, also.

Question4: Water purification is important for everyone's benefit & that helps the air, too.

Question5: yes

Question6: Just as you say.
