Question1: I recently read an article in the Hastings Tribune about reducing 3 billions dollars in Agricultural spending. Our priorities seem to be cut programs for Americans at Home and Open our Checkbook for Spending Overseas i.e. Iraq. What could be done with \$200 Billion. It seems to divide us into do you support the war or do you support Agriculture. This war has a direct correlation on domestic programs such as Agriculture and to the future generation of farmers entering production agriculture.
