Question1: We need the traditional credit programs for beginners.

There need to be new incentives, as well. There needs to be some tax advantage programs for retiring farmers to be able to sell their farms to beginning farmers.

Question2: Eliminate the sale of commodities below the cost of production.

Develop more programs the put locally grown nutritious food onto the table of low income consumers.

Question3: Maintain the Conservation Security Program to insure that it will work of small and mid sized farms.

Question4: Make sure that farmers can afford to achieve conservation and environment goals...if they need some low interest loan money to make improvements in the operations...have that money available to them.

Question5:

Question6: Support the development of micro and small business development in rural communities. Make sure that is training and development available to people.
