Question1:

Question2:

Question3: We need to support small farms more fairly, especially those farms who are producing organic products. These farms are good for our land and for our overall health and should be encouraged, not just the big farms that foul our streams and land with chemicals.

Question4: I strongly support any farm policy that would be anchored around cleaner air and water. We are poisoning ourselves and the future of our land.

Question5:

Question6: Yes!! Yes!! to supporting organic crops and renewable energy products such as biofuels!
