Question2:

Question3:

Question4: I believe we have good programs started such as CP 33, CRP, WHIP etc. However there are two areas we neglect. Livestock/Pasture areas need to be rewarded for good wildlife/environmental stewardship. Currently, without a crop history, land is essentially opted out of programs.

The second major issue we face in Missouri is the decision by state NRCS Leadership to no longer allow NRCS employees to participate in assisting on burning of native grass EVEN when the program guidelines call for fire as a recommended practice. This is clearly a reduction in the help and assistance we should be able to get from our county NRCS people.
