Question1:

Question2: Make sure we have a foreign trade policy that keeps existing markets and opens new ones. Have a policy that encourages U.S. farmers to be able to market their crops and not have foreign crops and produce have an unfair advantage.

Question3:

Question4: Continue and expand programs such as CRP, CREP, etc. These help the farmer by his not trying to raise crops in unproductive ground. The environment and habitat are helped by these. In addition the water and air that we humans need to survive become cleaner so we can continue to exist.

Question5: First of all, get rid of the Estate Tax! Stop taxing farmers into oblivion. More on the local level, zoning boards have to stop allowing developers to take farm land and turn them into malls and housing developments.

Question6:
