Question1: We need to end NAFTA. Let the US produce the food for the United States and the World. Let's not ask the American farmer to sell at third world prices and purchase production inputs at western world prices.

Question2: We can not compete. We have such high restrictions on our inputs; chemicals, enviro restrictions, labor. Third world has no restrictions.

Question3: As long as subsidies are payed on production they are equitable. Let's not turn subsidies in to welfare. Those people are penalised for working. You work we reduce.

Question4: Farmers are the best enviromentalists and conservationist. The land is there factorys. You damage the factory you reduce production.

Question5:

Question6: Remember, agricultures problems start because of over production. We are losing our markets to third world because of reasons stated above.
