Question1: There should be no price supports on subsidies.

Question2: There should be no interference with global markets by the U.S. government. The government should essentially not interfere with the free market.

Question3: There should be no assistance.

Let people produce to the best of their ability.

Question4: There should be no governmental interference with the producers.

Question5: This is not a legitimate Federal role. Leave it to the states.

Question6: Withdraw all subsidies for product development, marketing and research. This is not a legitimate federal function.
