State: Arizona

zipcode: 85354

Question1: All price supports should be income neutral for the US taxpayer. It is great to set parity but it should be set at a price that will also balance in times of shortages as well as abundance.

Why should farmers be subsidized to stay in business. Unless we want to set up a Welfare for Farmers?

If that is the case call it Farmers Welfare Act.

New farmers should only enter the industry if there is the economic viability for more farmers not because it is a "Honorable Profession" Maybe we should subsidize the Buggy whip manufacture???

The only "subsidy" would at the local level to tax farm land at use value not development value. Arizona does a good job at that. If other states could follow suit. If we cannot compete as farmers with the global market, we go bankrupt. Should we be subsidize the all American Businesses?

value not development value. Arizona does a good job at that. If other states could follow suit. If we cannot compete as farmers with the global market, we go bankrupt. Should we be subsidize the all American Businesses?

Question4: Since clean water and air is benefit to all. There should be a cost/benefit of subsidizing Conservation programs.

Question5: Information and education. Encourage Small business loan programs. Not Grants.

Question6: Information and education.
