Question1: drop all subsidies to farmers and to agricultural related production

Question2: The demanded product must be clearly identified. The quality of that product must also be clearly identified. The farmer then can produce to meet that criteria.

Question3: It should be totally eliminated.

Question4: It would appear to me that the present policy is intended to conserve fossil fuels, at the great cost and risk of using more chemicals. Somehow we must stop chemical farming.

Question5: The federal government as well as state governments should encourage the movement of job producing industry to rural areas.

Question6: It should be given the highest of priorities.
