Question1: Tax break for new farmers seeking to purchase existing land.

Question2: Stop things like CAFTA for starts.

And second..who is Japan kidding...demand open markets our we quit eating sushi.

Question3: I don't agree...the bigger the better who is kidding who?

Unless one is raising beef or speciality crops the "small family farm" is gone.

Question4: Let's really pay attention to CRP payments. Why not open that land for grazing rather than crop production? Proper rotation is good for the land rather than demanding it lie fallow.

Question5: How about some kind of national health care program for farmers? I know that is not the issue...but I'm trying.

Question6: When I can make more money from grapes than I can from corn... Let the market decide what we'll produce.
