Question1: We need our "farmers"! Any help, financial or otherwise should be provided. Don't let them be forced out of business due to ever escalating land prices!! Give them incentives and tax brakes and have their land designated forever as "farm producing" land!

Question2: We must protect the agricultural segment of our population at all cost! If tariffs are necessary to protect our farmers and farm produce; then so be it! American farmers, FIRST!

Question3: I know of no other viable way of distributing assistance, except to determine how the "family farm" is fairing in this modern day of large agricultural coops! Individual farmers need protection and should be screened to determine the amount of assistance that they need to continue their operations as a family enterprise.

Question4: Assistance should be given to individuals that encourage conservational endeavors; conservation easements, grants etc. Also, lower property taxes for those willing to engage in conservational pursuits.

Question5: Leave the farmers alone!! We have enough "economic growth" in our cities!!! We do not need to overdevelop our VALUABLE farm land! We don't need anymore "super WAL MART's" or any such garbage fostered on society in the guise of "ecomonic" growth!!!!

Question6: Our fantastic argricultural colleges have always lead the way in developing new specialty crops, etc. Help and encouragement should be given to those interested in pursuing such college programs. Individual help should be given to farmers by these colleges to encourage individuals to pursue a life on the farm!!
