Dear Sir,

As a representative of the New Hampshire Association of Agricultural Educator's there are several issues I would hope that you would address in the upcoming Farm Bill.

1. Continued support for research, teaching and dissemination of material related to the area of Sustainable and Alternative Agriculture.

2. Support the development of products that utilize our technology and resources to produce a cleaner environment or more favorable economy (ethanol, biodiesel etc.).

3. Support efforts to help young people become involved in agricultural and natural resources industries as a profession.

4. Continued support for the FFA and Agricultural Education.

Your kind consideration of these issues is greatly appreciated.

Sincerely

Ralph Odell
