Question1: end subsidies to large agribusiness corporations that are already make record profits and instead used that money to help out smaller independent farmers

Question2: The USDA should propose eliminating the most egregious factory farming practices, such as crates for pregnant sows and veal calves and battery cages for laying hens. It should also increase animal welfare laws and ensure unclean, injured animals aren't being sold on the market

Question3: Current subsidies benefit large producers that subject animals to intensive confinement, mutilations and aversive handling techniques. The USDA should stop providing financial assistance to producers that participate in practices shown by scientific research to be inhumane.

Question4: end factory farming practices which produces large amounts of manure and pesticide waste

Question5: ask smaller scale farms for input on how to support rural areas

Question6: the next farm bill should place and emphasis on building up free range and organic farms as it would reduce the pollution to the environment while providing healthier products for consumers
