Question1: Limit the number of animals any "farm" can have; this will create room for new farmers and will start to end agribusiness.

Question2: Country-of-origina labeling should be mandatory. If people do not trust a country's food supply, they would know now to buy it.

Question3: Assistance should be given ONLY for those people with a set limited number of animals and/or acreage.

Question4: Limit domestic support to agriculture to ONLY those people who implement clean air and water standards.

Question5: Subsidize ONLY farm programs for people with a specified LIMITED number of animals and/or acreage.

Question6: ONLY promote and subsidize farmers who provide organic and specialty crops and who use sources of renewable energy.
