Question1: First we do not help the little farmer who have made this country. My government is only into giving the rancher the big tax deductions, since my legislatures do this they get money in their pocket and this has to stop - the graft and greed has to stop

Question2: We should stop factory farming and let the animals have lifes and graze and then we can turn our lands like in the long ago past and we would be able to feed the world. Again we need to stop the graft and greed

Question3: This is the same as above - stop the graft and greed

Question4: We two legged animals have ruined about all that we have touched. We are the richest country in the world and yet we are poor and we do not help the poor because of our politicians greed and graft

Question5: Yes, we should care more about the rural and help the rural and stop helping the billionaire ranchers

Question6: We should do the above, but we need to get the politicians hands out of their pockets and out of the lobbists pockets and give the money to the rural farmer. Get the politics out of the picture.
